EDUCATION

Lehigh University

August 2022 - May 2026

Bachelor of Science in Computer Science and Business

GPA: 3.62

- **Select Courses:** Discrete Structures & Algorithms, Operating System Design, Database Systems, Software Engineering Principles, Computer Architecture, Business Application Design, Web Systems Programming, Business Communications, Accounting

PROFESSIONAL EXPERIENCE

Javelin

March 2025 - March 2026

Software Engineer Intern - Remote

- Developed a Go-based AWS Lambda service to validate 12 API keys twice daily, adding retry logic and DynamoDB failure logging to improve reliability
- Engineered a dynamic search-query builder supporting 8 user-facing inputs across 7 PostgreSQL tables and roughly 5,000–6,000 rows, using indexed queries and cross-table checks to increase search speed and reduce invalid query responses
- Integrated Zod-based server-side validation across 8 user-input API routes to enforce runtime schema checks and improve backend robustness

Certifydoc

May - July 2024

Software Engineer Intern - Barcelona, Spain

- Collaborated with a team of 5 interns to build a Next.js and React web application across 3 core screens for media upload and account workflows, integrating with existing APIs and backend logic
- Reimplemented hashed credential storage and secure session handling in the new application to preserve a secure authentication flow across frontend and backend systems

LEADERSHIP EXPERIENCE

Lehigh University Brazilian Jiu-Jitsu Club

March 2024 - May 2026

Secretary and Cofounder

- Helped found Lehigh University's first Brazilian Jiu-Jitsu club and grew membership from zero to 200+ in GroupMe, including a peak event attendance of 65 members through outreach and member engagement
- Coordinated weekly reminders and biweekly events through email and GroupMe, helping run over 90% of practices and organize meetings with officers and coaches

PROJECT EXPERIENCE

LockerRoom

April 2026

- Built a Next.js sports platform with Supabase realtime chat, authenticated room messaging, and live sports data routes for scores and summaries
- Developed backend API routes for auth callback handling, room message retrieval/posting, and sports-specific event pages
- Designed live game rooms combining recent plays, authenticated chat, and event context to support real-time sports discussion

Headlines and Sidelines

February 2026

headlinesandsidelines.com

- Built a full-stack sports news platform combining editorial content and live ESPN data, publishing 2 sports articles per day throughout February with a TypeScript React frontend, Markdown-based CMS, and custom Node.js publishing pipeline
- Integrated ESPN's sports data API for real-time scores and standings across NBA, NHL, NFL, MLB and EPL coverage, using 5-minute client-side caching and error boundaries to reduce repeated refetches and handle rate limits gracefully
- Configured a GitHub Actions CI/CD pipeline for automated linting, type-checking, and zero-downtime deployment to Vercel

AigentZ & iQube Protocol

January - December 2025

- Engineered integrations with 4 AI services to enable AI-driven querying and interaction with blockchain-secured personal data payloads (iQubes) as part of Lehigh's Capstone program
- Owned the cloud infrastructure migration, configuring EC2, GoDaddy DNS and name server routing, Route 53, Secrets Manager, and Amplify to move the project from a reverse-proxied local prototype to a stable production environment

TECHNICAL SKILLS

- Languages and Frameworks: Java, Go, JavaScript, TypeScript, Python, SQL, React, Next.js
- Cloud and DevOps: Git, Docker, Redis, AWS Lambda, Route 53, EC2, S3, Amplify, Cognito
- Languages Spoken: English (native fluency), Spanish (basic to intermediate)
